

Press Release

HOLE PRO® LAUNCHES INTRODUCTION OF THE XL ARBOR FOR HOLE PRO ADJUSTABLE HOLE CUTTERS

June 2008 – LIGHTSMITH, a leading distributor of professional grade hole cutting tools, announced the launch of its XL-Arbor kit. The perfect addition to the Hole Pro adjustable hole cutter kits! The XL Arbor Kit converts all Hole Pro shields used in Twin Blade X models and the Single Blade CL models for use with any hole saw. The unique dual-head design permits mounting either a 5/8"-18 or 1/2"-20 thread hole saw.

The ABS shield collects all the dust and shavings, and the orange adjustment knob makes it easy to control the depth of the cut — no fear of accidentally cutting a hidden wire or pipe.

Product Features

The XL-Arbor is targeted at any professional who uses hole saws and requires precise cutting and a clean work area.

The XL-Arbor kit includes:

1. XL Arbor
2. Yellow storage pouch
3. Tensioning spring
4. Release bar
5. Hex wrench
6. Titanium coated High Speed Steel pilot bit
7. Spacer disk
8. *** Excludes: ABS transparent shield and orange knob (both provided in X and CL model kits)

Ease of Use

If necessary, the release bar is used to provide tension when removing the hole saw after use, which can be performed in seconds.

About Lightsmith - Hole Pro (www.holepro.com)

Lightsmith provides unique hole cutting tools for use by professional trades people, including electricians, HVAC and refrigeration contractors, audio and CCTV security systems installers, carpenters, MRO engineers, plumbers, and remodelers.
