

BLUE BOAR®

TCT Tungsten Carbide Tipped High Performance Hole Cutters

Stucco-Brick & Plywood Hole Cutters

Blue Boar Stucco-Wood cutters are engineered with special ultra hard TCT tungsten carbide tips designed to cut through stucco and brick siding and then through plywood or OSB sheathing underneath, all while using the same bit.

Fast, efficient boring of clean holes provides a perfect solution for electricians, HVAC, insulation, plumbing, and general contractors.

Cutting depth of 2-1/8" (60mm) and trade sizes from 1" (25mm) up to 6-1/4" (159mm). Use with 1/2" drill chuck.

- 2-1/4" (60mm) Deep Cutting Depth
- Sizes from 5/8" to 6-1/4" diameter
- Super Tough diamond ground Tungsten Carbide
- Cuts 10 times faster than bi-metal hole saw
- Hundreds of holes without resharping
- Aggressive cutting tip angles that minimize binding
- Drop shaped chip clearance slots for greater chip removal for fast uninterrupted cutting and rapid removal of the cut plugs.

Self-Feed TCT Multipurpose Hole Cutters

Blue Boar® Self-Feed TCT tungsten carbide tipped hole cutters outperform and outlast hole saws, cutting a wider range of materials. Use with any 5/8"-18 drill arbor. 2-1/4" cutting depth and sizes from 5/8" to 6-1/4".

Engineered with a unique tooth rake for faster cutting and special drop shaped clearance slots for fast chip and plug removal. Blue Boar TCT Self-Feed hole cutters greatly improve productivity. They provide rapid stock removal, extended life, smooth, heat-free sawing of all wood species, MDF, OSB, plastics, cement board, chipboard, and ceramic tiles. With 2-1/4" cutting depth, they cut through strapping and joists with ease. Modern hole cutters that are perfect for today's cordless drills.

Blue Boar® TCT tungsten carbide tipped hole cutters outperform and outlast dozens of ordinary hole saws and save users time and money. Faster cutting and faster plug removal hole after hole.

Bore holes in a wide range of materials using a single hole cutter.

Universal TCT Super Duty Hole Cutters

The Universal hole cutters combine heavier gauge side walls and thicker base plates with ultra deep gullet slots, and super hard tungsten carbide (RA 90-91) cutting tips to provide the ultimate hole cutting capability. Nothing else compares in performance and durability. 2-1/4" cutting depth and sizes from 1" to 4-1/4" diameter. Use with any 5/8"-18 drill arbor.

Available both individually and in complete kits with heavy duty storage cases.

- Tough diamond ground Tungsten Carbide cutting tips
- Cut 10 times faster than traditional hole saws
- Quick and easy removal of cut plugs
- Cut hundreds of holes without resharping

Blue Boar® TCT Kits Components

SELF-FEED TCT Kit TSF12 Six (6) Multipurpose TCT hole cutters 3/8" Mandrel and 4 Pilot bits (2 Flat Wood, Carbide Masonry, and HSS twist bit) Heavy duty storage case	2-1/8", 2-1/4", 2-5/8", 3", 3-5/8", 4-1/4"	Wood, veneer, plywood, MDF, OSB, chipboard, Formica, plastics, plaster, fiber cement board, roof tiles, suspended floors, fiberglass, vertically perforated brick and masonry, wall tile up to Grade 6
SELF-FEED TCT Kit TSF10 Four (4) Multipurpose TCT hole cutters 3/8" Mandrel and 4 Pilot bits (2 Flat Wood, Carbide Masonry, and HSS twist bit) Heavy duty storage case	3", 3-5/8", 4-1/8", 4-5/8" Service Entrance Sizes	Wood, veneer, plywood, MDF, OSB, chipboard, Formica, plastics, plaster, fiber cement board, roof tiles, suspended floors, fiberglass, vertically perforated brick and masonry, wall tile up to Grade 6
UNIVERSAL TCT Kit TUH14 Eight (8) Super Duty TCT hole cutters Ultra Hard RA 90 Carbide Tips 3/8" Mandrel and 4 Pilot bits (Flat Wood, Carbide Masonry, Porcelain Carbide spear point, HSS twist bit) Heavy duty storage case	1", 1-1/8", 1-3/8", 1-1/2", 1-3/4", 2", 2-1/4", 2-1/2"	Wood, veneer, plywood, MDF, OSB, chipboard, Formica, plastics, plaster, fiber cement board, roof tiles, suspended floors, fiberglass, vertically perforated brick and masonry, wall tile up to Grade 6
UNIVERSAL TCT Kit TUH12 Six (6) Super TCT hole cutters Ultra Hard RA 90 Carbide Tips 3/8" Mandrel and 4 Pilot bits (Flat Wood, Carbide Masonry, Porcelain Carbide spear point, HSS twist bit) Heavy duty storage case	2-1/8", 2-1/4", 2-5/8", 3", 3-5/8", 4-1/4"	50% more teeth for exceptional durability

BLUE BOAR®
the professional's choice™

Hole Pro

SHEET ROCK • PLASTER • WOOD • OSB • MDF • CEMENT BOARD

Hole Pro® adjustable hole cutter kits come with both user replaceable tungsten carbide blades for cutting sheetrock, plaster, fiberglass, MDF, Hardie siding, and High Speed Steel blades for quickly cutting clean holes in wood and plastics.

Adjustable twin blade design for perfect balance and greater durability and ball bearing mounted ABS plastic safety shields. Slots collect the shavings for continuous visibility and the soft silicon gasket keeps the dust inside the shield. Easy to adjust for the exact hole size needed.

Composite plastic safety shield works like a portable drill press by keeping the hole cutter perpendicular to the surface and providing an adjustment to limit the depth of the cut (no accidental cutting of hidden wiring or plumbing), while safely trapping all the dust and shavings.

Cut larger holes fast without the mess!

Just two blade tips make contact with the material being cut so only 1/3 the torque is needed to cut a hole as compared to using a hole saw. Smaller and lighter drills can be used to cut hole after hole, and cordless drills can cut more holes per charge. Also much reduced risk of the drill stalling and kickback as when a hole saw hits a joist or stud and the drill and its operator are spun in the opposite direction.

The Hole Pro® adjustable hole cutters are faster, easier, safer, and cheaper to use with their replaceable blades than hole saws. Most heavy duty multi-range 1/2 inch power drills are rated for a maximum hole size of 3-1/2" in wood using hole saws or self feed bits. The same hand drills can be used with a Hole Pro® hole cutter to cut holes up to 12" in diameter in wood, plaster, cement board, and even plywood.

XL-Arbor Kit

The perfect addition to the Hole Pro adjustable hole cutter kits! The XL Arbor Kit converts all Hole Pro shields for use with any hole saw. Unique dual-head design permits mounting both 5/8" -18 and 1/2" -20 threaded hole saws with up to 2-1/2" cutting depth, without the need for two arbors or for any additional mounting adapters.

The ABS shield collects all the dust and shavings, and the orange adjustment knob makes it easy to control the depth of the cut — and no accidental cutting of a hidden wire or pipe. Great for use with the new Blue Boar TCT hole cutters with their aggressive cutting action. The cut plug is easily removed and the hole cutter is ready to cut the next hole.

Hole Pro - both Twin & Single Blade Models

Hole Pro provides both single and twin blade models. The twin blade models provide faster cutting, perfect balance, great durability, and are the best choice for cutting holes in residential and commercial settings. The single blade models make it easier for power hand drills to cut heavy gauge sheet metal and are recommended for everyday use in fab shops.

*CL-285 single blade hole cutter recommended for sheet metal shop use

- Commercial grade
- Heavy duty ball bearings
- Needs 1/3 the torque of a hole saw
- Blades replaceable in seconds
- Traps & holds cut plug, dust & debris
- Twin blades for exceptional balance, durability and an overall cleaner cut
- Industrial grade ABS shield, the same material used in hockey helmets!
- Cuts the exact size hole needed
- Adjustable cutting depth control - no slicing into hidden wires or pipes
- All Adjustable Hole Cutter kits include Hole Pro® hole cutter, ABS shield, tungsten carbide & high speed steel blades, hex adjustment wrenches, hard shell carry case, and a 5-year warranty

Faster • Easier • Safer
